FEDERAL MILK ORDER MARKET STATISTICS

Highlights

March 1966

<u>Producer Deliveries</u>. A total of 150,041 producers, 10,306 fewer than March 1965, delivered 4.7 billion pounds of milk to regulated handlers in 72 comparable markets during March 1966. This represents a decrease of 2.9 percent under producer deliveries in March 1965. Average daily delivery per producer increased from 984 pounds in March 1965 to 1,021 pounds in March of this year. Producer numbers, producer deliveries, average butterfat percentages, and average daily deliveries per producer for individual markets are shown in table 3.

Producer Deliveries Used in Class I. The volume of producer deliveries used in Class I in 72 markets increased 2.0 percent from last year, to a total of 3.1 billion pounds for the month of March 1966. The average utilization percentage for March was 65 percent, up from 62 percent last year. Thirty-two markets showed an increase in the utilization percentage, 12 showed no change, and the remaining 28 markets showed a decrease (see table 4).

Gross Class I sales, which comprise total Class I sales by regulated handlers, in-and-out of defined marketing areas, reflected a similar increase of 2.1 percent in the 72 markets for the month of March.

Minimum Prices. The weighted average Class I price paid by handlers in the 72 markets for 3.5 percent milk was \$5.26 per hundredweight, 45 cents higher than the \$4.81 per hundredweight price in March 1965. Minimum Class I prices in March were higher in 71 markets and unchanged in one market.

Producers in the 72 markets received a weighted average blend price of \$4.67 per hundredweight for 3.5 percent milk. This is 48 cents higher than the March 1965 blend price of \$4.19. Producers received higher blend prices in all 72 markets. Class prices, blend prices, and associated butterfat differentials, by markets are reported on table 1.

Whole Milk Sales. Total in-area whole milk sales for March 1966 in 69 marketing areas are estimated to be about 2.0 billion pounds, 0.2 percent above such sales in March of last year. Complete February in-area sales for total fluid items, and for the four major fluid product groupings (whole milk, skim milk items, mixtures, and cream), are reported on table 6.

YEAR TO DATE

Minimum Prices. The weighted average Class I price for the January-March period for the 72 markets was \$5.24, 28 cents higher than the \$4.96 price in 1965. The 1966 weighted average blend price was \$4.65, 35 cents higher than the blend price of \$4.30 reported for this period in 1965 (see table 2).

Producer Deliveries and Deliveries Used in Class I. Milk deliveries and deliveries used in Class I are reported for individual markets in table 5. In the first three months of this year, compared to the same period in 1965, producer deliveries for the 72 markets were down 3.2 percent, and deliveries used in Class I were up 3.0 percent. Data for the 72 markets and for all markets are summarized below:

Producer Milk Deliveries and Deliveries Used in Class I, January-March

MAJOR ORDER ACTIONS, MARCH 1966

Amendments:

Cincinnati - March 1 (31 FR 3225, 3/1/66). Amendment deletes from the order a separate Class II classification for milk in certain manufactured products, principally ice cream, ice cream mix, and cottage cheese, priced on the basis of a "butter-nonfat dry milk solids" formula. Class II and Class III are combined into a single Class II classification. Action changes the maximum supply-demand adjustment from plus or minus 50 cents to plus or minus 39 cents. The Class II price is the lower of the Minnesota-Wisconsin price or the butter-powder formula price plus 10 cents. (The butter-powder formula used is the Chicago 92-score butter price times 4.2 plus Chicago area nonfat dry milk spray price minus .055 times 8.2025.) The local plant average price used previously in Class III pricing was deleted from the order by this amendment. The Class II butterfat differential is the Chicago 92-score butter price for the month times .115. Comforming changes in provisions for other source milk, fluid milk products, transfers, allocations, and location differentials.

Dayton-Springfield - March 1 (31 FR 3227, 3/1/66). The maximum supply-demand adjustment is changed from plus or minus 50 cents to plus or minus 39 cents.

Minneapolis-St. Paul - March 1 (31 FR 2696, 2/12/66). Amendment reduces the percentage requirements for pool distributing plants. To qualify for pooling, a distributing plant must dispose of at least 30 percent (reduced from 40 percent) of his total receipts on routes in each of the months of January through June, and at least 50 percent (reduced from 60 percent) in each of the months of July through December. The area within which milk may be transferred to nonpool plants and classified according to actual use is expanded from 100 miles to 150 miles from St. Paul, Minnesota. The Class I butterfat differential is the New York 93-score butter price times .12; the Class II butterfat differential is the New York 93-score butter price times .115; and, the producer butterfat differential is the weighted average of Class I and Class II butterfat differentials. Slight revision of location adjustment provision. Action changes the date of payments to the producer settlement fund from the 16th to the 18th after the end of the month and the payments from the fund from the 17th to the 19th.

Oklahoma Metropolitan - March 1 (31 FR 3227, 3/1/66). Producer definition changed with respect to milk diverted from or to other order plants. Skim milk and butterfat in inventory of packaged fluid milk products is classified in Class I. Inventory of bulk fluid milk products would continue to be classified in Class II. Oklahoma City remains as the basing point for location adjustments. For plants located outside the state of Texas and the southwestern part of Oklahoma, and between 50 to 150 miles from Oklahoma City, deduct 10 cents and an additional 2 cents for each additional 15 miles up to 240 miles. One cent is deducted for each 15 miles beyond 240 miles. Action requires a distributing plant subject to regulation under this order to continue to be regulated under this order until the third consecutive month in which it has greater route distribution in the marketing area of another order. Conforming changes in provisions for transfer and allocation.

Ozarks - March 1 (31 FR 3191, 2/26/66). Amendment revises the fluid milk product definition to exclude frozen dessert mixes, sterilized milk and milk products in hermetically sealed containers and sour cream or sour cream mixtures not labeled "Grade A", and to include concentrated milk, fortified and reconstituted skim milk or milk.

Upper Chesapeake Bay and Washington, D. C. - March 1 (31 FR 3381 amd 3382, 3/4/66). Amendment increases the basic Class I price from \$5.35 to \$5.55 for the months of July 1966 through February 1967 subject to a supply-demand adjustment. The Class I price remains in the order at \$4.90, plus or minus the supply-demand adjustment for the months of March through June 1966, except that the March through June 1966 price cannot be less than \$5.40.

MAJOR ORDER ACTIONS, MARCH 1966 -CONTINUED

Suspensions:

36 Markets - March 2 (31 FR 3383-3385, 3/4/66).

Action suspends portions of the pricing provisions of each of the orders listed above to maintain respective Class I prices at about their January 1966 levels. (The following markets are similarly affected since their prices are based upon markets listed above: Ozarks, Red River Valley, Lubbock-Plainview, Central West Texas, Austin-Waco, San Antonio, Corpus Christi, St. Joseph, and Youngstown-Warren.)

Determination:

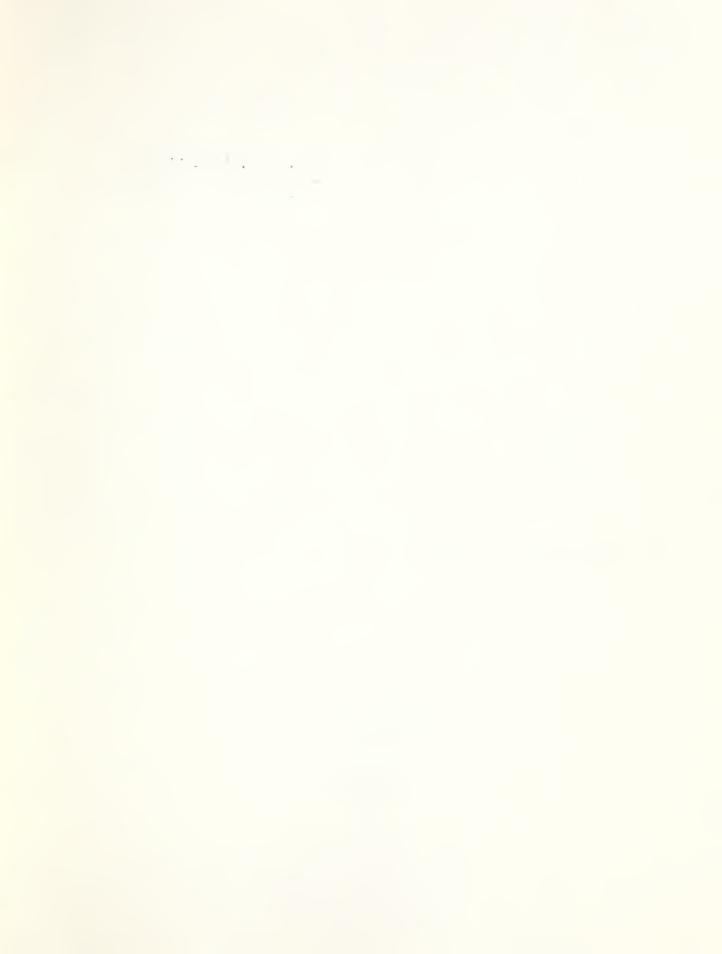

67 Markets - March 1966 (31 FR 5481, 4/7/66). (Markets excluded: Connecticut, Massachusetts-Rhode Island, New York-New Jersey, Upper Chesapeake Bay, Washington, D. C., Delaware Valley, and Minneapolis-St. Paul.) The equivalent March 1966 prices to be used for the computation of class prices and butterfat differentials are as follows:

93(92)-score butter at Chicago - 63.52 cents.

92-score butter at Chicago - 63.40 cents.

Termination:

Quad Cities-Dubuque - March 1 (31 FR 3190, 2/26/66). Action deletes the base-excess plan from the order.
